

ATAL UPADHYAY

Mumbai, India | P: +91 7984146390 | atal.upadhyay98@gmail.com

SKILLS

Technical skills : Python | Django | Django REST Framework (DRF) | Django-jasmin | FastAPI | PostgreSQL | MongoDB | MySQL | Docker | Kubernetes | AWS (EC2, S3, RDS, Lambda, ECS, CloudFront) | Azure Services | Git | GitLab CI/CD | Keycloak | Celery | Redis | ETL Pipelines | AI/ML Integration | LLMs (LangChain, OpenAI API, Hugging Face) | Whisper APIs | WebSockets | Microservices Architecture | Multi-Tenant SaaS | Pandas | GeoPandas | Data Visualization (Matplotlib, Plotly) | Public Data APIs | Shell Scripting | SMTP | Webhooks | Cron Jobs | Agile/Scrum Methodologies | Jira | Temporal

WORK EXPERIENCE

Software Engineer Lead, ETIOT Pvt. Ltd.

Dec 2025 - Apr 2026

Project: *BPCL-EV - Beckn Protocol EV Charging Platform*

- Architected and built a Beckn-compliant BPP for BPCL's EV network using FastAPI, Temporal, and OCPI 2.2.1, enabling end-to-end charging lifecycle and reducing session initiation latency by 35% via async workflows and caching.
- Developed a fully OCPI 2.2.1 integration layer for multi-CPO interoperability (EVSE discovery, availability, tariffs, webhooks), improving charging station discoverability by 60%.
- Engineered scalable microservices architecture using FastAPI, PostgreSQL, and Redis, optimising catalog discovery, order management, and payments — boosting backend throughput by 40%.
- Implemented real-time event-driven communication using webhooks and async processing for session updates and status sync across distributed systems, significantly improving system reliability and reducing state inconsistency issues.

Software Engineer, CapitalNumbers Pvt. Ltd.

Aug 2024 - Nov 2025

Project: *Planzookie – AI-Powered Community Planning Platform*

- Designed backend architecture enabling AI-driven generation of structured planning documents contextualised with real-world datasets (Census, Transportation, Parcel).
- Built AI workflows leveraging LLMs (LangChain, OpenAI) to auto-generate domain-specific document sections, improving report creation efficiency by 60%.
- Integrated automated data visualisations and mapping modules using quantitative datasets to enhance report accuracy and user engagement.

Project: *AI-Powered Audiobook Mobile Platform*

- Engineered backend APIs supporting audiobook playback, multilingual subtitle generation, and AI-driven voice/text interactions for 1K+ users.
- Designed gamification modules (XP points, badges, leaderboards) and optimised AWS Lambda-based inference latency, reducing response times by 40%.
- Built real-time analytics dashboards to monitor ticket volume, customer satisfaction, and channel performance, enhancing operational visibility and decision-making.

Project: *RVIN – Merchant Support System*

- Built AI-powered merchant support platform automating customer query handling across WhatsApp, Instagram, and Email, improving response efficiency by 40%.
- Developed AI/ML pipelines leveraging merchant-specific knowledge bases for context-aware automated responses.

Project: *Spotwork – Multi-Tenant SaaS Job Board Platform*

- Architected multi-tenant backend supporting 100+ isolated tenant databases with role-based access control.
- Deployed microservices on AWS ECS with Dockerized containers and GitLab CI/CD pipelines, ensuring 99.9% uptime.

Software Engineer - Freelancer, MSCPL DCGO

Apr 2024 - Aug 2024

Project: MSCPL DCGO (*Diligent Coverage and Goal ops*)

- Designed and developed a microservices-based HRMS web application to automate and streamline B2B operations, improving process efficiency by 40%.
- Built RESTful APIs and dynamic backend modules using Django and DRF, enabling seamless integration between HR workflows and user-facing interfaces.
- Implemented ETL pipelines and automation scripts for data migration and synchronisation, reducing manual processing time by over 60%.
- Deployed and managed the platform on AWS using Docker containers, ensuring high availability, scalability, and secure access for enterprise users.

Software Developer, ASPL

Feb 2023 - Mar 2024

Project: Indian Oil Corporation Limited (*Crude Department*)

- Developed and deployed a microservices-based shipping and logistics web application, improving operational efficiency and real-time vessel tracking for multiple departments.
- Designed and implemented ETL scripts to fetch, clean, and process vessel data from third-party APIs, ensuring 99% data accuracy and real-time updates across dashboards.
- Built and optimised RESTful APIs using Django and DRF to handle multi-department workflows, reducing manual reporting time by over 40%.

Project: Indian Oil Corporation Limited (*Coastal Department*)

- Developed and maintained backend modules for a logistics and shipping management platform, enabling real-time vessel tracking and operational visibility.
- Implemented optimised ETL scripts to automate data extraction and transformation, reducing manual data handling time by 40%.

Project: Shree Cement

- Developed a logistics and inventory management web application, improving operational efficiency and real-time data visibility.
- Optimised backend performance and database operations, enabling faster data retrieval and smoother system scalability.
- Collaborated with cross-functional teams to ensure reliable deployments using Docker and version control best practices in Git.

Software Developer - Freelancer, Mindframeworks

Jul 2022 - Dec 2022

- Scrutinized inventory, sales, and shipping data, and developed an inventory tracking system with Tableau, enhancing operational efficiency by 25% and reducing stockouts by 30%.
- Built a contract analysis model with Django Rest Framework, MongoDB, and NLP, boosting extraction accuracy by 75%.

EDUCATION

Symbiosis Institute of Computer Studies And Research

M.Sc in Computer Application

Pune, Maharashtra

Jun 2020 - Jul 2022

Maharaja Sayajirao University

B.Sc in Mathematics

Vadodara, Gujarat

Jun 2017 - Jun 2020

CERTIFICATIONS

DeepLearning.AI | TensorFlow Developer | Microsoft Power BI Desktop | Google Data Studio for Data Visualization | SQL for data analysis and data science | Machine Learning Masterclass
